Subject: leter concerning the votepad

To whom it may concern:

I Harriotte Hurie Ranvig, have had the good fortune, to be one of the blind individuals to test the votepad prototype. I have been voting in elections since 1964. If my district adopts the votepad this year, it will be the very first time that I will be able to independantly and privately vote, in my life! The votepad is a simple effective tool. I had no problem understanding its' design and function, and practicing with it using the taped instructions . Further, Because I have been and avocate for individuals with a wide variety of disabilities, I could also get a strong sense of how well the votepad would acommodate individuals with, for example, dextderity issues.

I sincerely hope, that letters like mine, will forward the speedy endorsement of the 'voatepad" as the simplest and most economical, not to mention effective means to fulfill the "help Americans Vote Act".

Sincerely,

Harriotte Hurie Ranvig
